The Caesarstone Quartz Sink is forged from the same standard-setting materials that Caesarstone is famous for worldwide. The Caesarstone Sink offers all of the advantages of a Caesarstone surface: strength, beauty, durability, and ease of maintenance.

Made from Natural Quartz Crystals

Caesarstone sinks are made from natural quartz crystals - the same materials used in Caesarstone's premium countertops and interior surfaces. Caesarstone's ultimate surfaces are stain, scratch and crack-resistant, impervious to heat and cold, and unaffected by common household chemicals. Caesarstone has innovated a unique manufacturing process that gave rise to the Caesarstone Quartz Sink - designed to enable both flat and undermount installation of sink into countertop.

Mix or Match

Available in five timeless colours from Caesarstone's Classico Collection (Pure White, Snow White, Ivory, Sleek Concrete and Grey), the Caesarstone Sink is specifically designed to provide a clean, monochromatic, uniform design to perfectly match the colour and texture of the paired Caesarstone countertop.

It can also provide the perfect complementary tone for every countertop colour and texture. Mixing and matching among Caesarstone sinks and surfaces creates a wide array of designs to accommodate the sophisticated tastes and dynamic styles of a discerning clientele.

The Caesarstone Quartz Sink Technical Specifications

It is the responsibility of the sink installer to check suitability of the countertop and to install on a flat countertop, including a standard curvature of +/- 2.5 mm before installation. Complaints about the suitability of the sink for flush installation within the warranty will be received only prior to the installation. During installation glue the sink with silicon only and not marble glue.

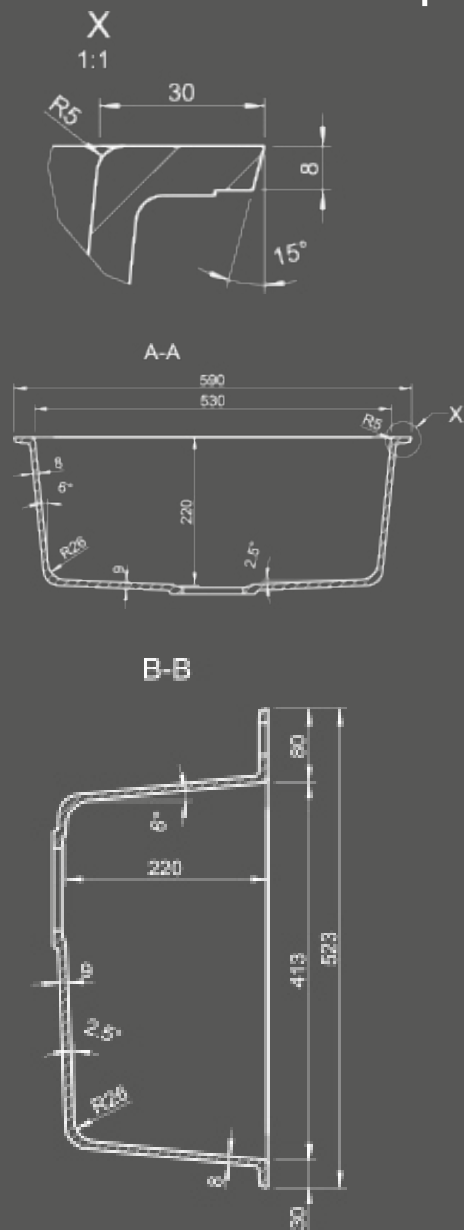

Maintenance: Stain-Resistant / Scratch-Resistant / Heat-Resistant
