Caesarstone quartz – beauty and strength combined

Quartz is more than beautiful. It is also one of nature's strongest minerals. Impervious to stains, scratches and cracks, quartz is heat and cold resistant. Caesarstone surfaces combine form and function, allowing for the most diverse, durable and practical applications. Our surfaces retain the cool, tactile qualities of natural stone, while offering design freedom with almost unlimited application possibilities.

Since 1987 Caesarstone has been pioneering with quartz, developing thousands of designs and launching hundreds of successful new products, with more in the pipeline each and every year.

The concrete series

Caesarstone has taken on the new raw trend of industrial design and pushed it further with the innovative Concrete Series.

This series makes a genuine design statement, combining the coarse concrete trend fused together with Caesarstone's enduring quality and durability to deliver a surface of unparalleled performance and style.

All our concrete-inspired surfaces have a honed (non-glossy) finish to capture the essence of concrete.

Collaborating with leading designers

World-renowned designers and architects choose to partner with Caesarstone to set new design trends. While our collaborations have garnered many design awards, they have a much more important function for us. Design collaborations push us to push boundaries. We seek to innovate. Our ambition is to consistently set new standards for your interiors - to pioneer new styles, new collections and new textures that give our customers the latest, most cutting edge designs.
